

## **NOTICE TO PARENTS**

The Food Service Department of Clare Public Schools is proud to be of service to you and your children. We are determined to provide good, nutritious food for your children which will help them in their learning and development. We are asking all parents to regularly review the balance of their child's/children's food service account. We are grateful to those parents who are making sure that the food service account balance of their children does not go into the negative. However, we are concerned that there are too many outstanding balances of \$20.00 or more owed to the school for food services for your children. Please, we ask that all parents make sure that any account balances for their children that are in the negative be brought current as soon as possible so not to cause an undue hardship and strain on the schools already limited budget. Parents can bring their children's account balances current in three ways: (1) mailing a check directly to Clare Public Schools; (2) sending a check to school with their children; or, (3) by depositing money in the Student Meal Account at <http://www.sendmoneytoschool.com>. This is a convenient way to build up an account balance for your child to use.

If you have any questions or concerns please see the Food Service Charge Policy notice on this page. If you are having any difficulties in bringing your child's/children's account current please feel free to contact the Food Service Department at Clare Public Schools to assist you with possible payment arraignments, or perhaps, other type of arraignments as may be deemed necessary to bring your child's food service program account current. Thank you from the Food Service Department at Clare Public Schools.
